

## CONCLUSION

Brookside Gardens is a regional treasure, offering a wonderful educational and recreational experience to the public. It seeks to improve that offering through a vision of judicious renovations, needed replacements, and garden renewal over an extended period of time. The Master Plan addresses the concerns of the Planning Board - to more fully emphasize the gardens of Brookside - while leaving in place the remainder of the proposals put forward in the 2001 Draft Master Plan, which were well received by community stakeholders and the Planning Board. Brookside Gardens believes we now have an achievable and exciting new blueprint for the future.
